### West Chester University Fiscal Year 2002-2003 Budget Proposal

Please refer to the attached copies of the FY 2002-03 Funds Summary and the FY 2002-03 Unrestricted E&G Budget Projections. As a result of the shortfall in state revenues, the Governor's budget for FY03 reduced the appropriation to the State System of Higher Education by 3% (or \$14.2 million). The System also received a Special Projects appropriation of \$16.8 million, \$15 million of which will be dedicated to ongoing implementation of the Shared Administrative System, and approximately \$1.5 million earmarked for recruitment and retention programs. Of the \$439 million appropriated to the State System, \$12.9 million was earmarked by the System Office to fund seven line items including SCUPA and APSCUF professional development funds, the McKeever Environmental Learning Center and System-wide Performance Funding, reducing the appropriation available for distribution to the 14-universities to \$426,240,087. West Chester University was notified on July 1, 2002, that the University's appropriation for FY03 would be reduced by 5.03% (or \$2.3 million). Appropriation reductions across the 14-System universities ranged from 1.66% (Cheyney) to 5.88% (Indiana) and were based on a two-thirds across-the board reduction with the remaining one-third reduction based upon an adjusted formula calculation.

#### <u>Revenue</u>

On July 11, 2002, the Board of Governors approved the following tuition rate increases for FY03:

| Resident/Non-Resident Undergraduate | 9.0%  |
|-------------------------------------|-------|
| Resident Graduate                   | 14.2% |
| Non-Resident Graduate               | 11.3% |

In addition, the Board approved a new Instructional Technology Fee of \$100/year designed to "enhance student access to technology" and "ensure cutting-edge class-rooms." This new fee is a flat assessment (per student) rather than a credit-generated fee such as the Educational Services Fee and will differentiate between resident and non-resident students (\$100/year and \$150/year respectively). At this time policy guidelines have not yet been finalized by the Board of Governors. The initial draft suggests that the entire fee will be earmarked for new technology only and can be used to supplant but not replace existing funding.

Tuition revenue for the FY03 academic year is projected to increase overall by 9% (approximately \$4.1 million). This projection includes no enrollment growth as it is unclear what impact tuition and fee increases will have on paid enrollment. Approximately 4% enrollment growth is anticipated at the graduate level, and the opening of the Graduate

Business Center at the McDermott Drive facility is expected to generate increasing interest in the MBA and MSA programs, including the Tech MBA and certificate offerings. However, data suggests that graduate students are more cost sensitive than their undergraduate counterparts, and higher tuition and fees may force some students to postpone their graduate education. Summer school revenue is projected to increase by 19% over FY02 budgeted revenue due to ongoing growth in the summer sessions.

While miscellaneous revenue is expected to increase by 29%, due in large part to anticipated rental income from the McDermott Drive property, interest income is expected to decrease 45% over the FY02 projection. As noted in the Budget Status report for FY02, interest income fell 38% short of projections last fiscal year. Although return rates have been somewhat stable over the past several months, the University is not anticipating growth in interest revenue over the next year.

#### **Expenditures**

Personnel and benefits costs continue to be the largest expenditure item in the University budget. Overall, salary costs are expected to increase by 4.03%. This increase is less than initially projected as some vacant positions were abolished, savings targets increased, and graduate and student wages reduced as part of divisional budget reduction plans to meet the FY03 revenue shortfall. In addition, a selective hiring freeze was imposed in Fall 2002, which is anticipated to reduce personnel expenditures and to position the University for further budget reductions in FY04. Expenditures in the Academic Year Model are expected to decrease as the college/schools are working towards increasing average class size, which will reduce spending for salaries and benefits.

Increments and across-the-board increases for FY03 are as follows:

| $\triangleright$ | AFSCME (non-instructional) | 5.70% |
|------------------|----------------------------|-------|
| ≻                | APSCUF (faculty)           | 5.50% |
| $\succ$          | Management*                | 5.50% |
| $\triangleright$ | SUA/SCUPA                  | 4.75% |
| $\triangleright$ | Other                      | 5.70% |

\*To be determined by the Board of Governors at the October 2002 meeting. If a management increase is approved, all indications are that the increase will be retroactive to July 1, 2002. Benefit rates, which are negotiated at the System level and dependent upon bargaining unit, are also projected to increase for FY03 by 8%. Hospitalization costs are projected to increase between 8.63% and 12.43%, while Health & Welfare increases will range from 12.29% to 17.30%. Annuitant hospitalization costs, which is the amount paid by the employer to cover retiree health benefits, are expected to increase from 1.86% to 2.97%, which is significantly less than FY02's 15%-25% rate increase. For FY03, no increases are anticipated in the employer contributions for TIAA-CREF and SERS, the two major retirement plans for University employees. The TIAA-CREF rate is currently 9.29% while SERS is a zero contribution rate. However, information recently received from the System Office indicates that while the SERS contribution rate has been stable (0%) for the past two years, it is expected to increase to 1.42% starting in FY04. Savings for FY03 were realized in anticipated benefit expenditures due to elimination of budgeted positions and increases to savings targets.

Operating expenditures have also been reduced in response to the FY03 funding shortfall. A net reduction of 28% was made to the University's Critical Needs budget, which is a source of additional monies used to fund special campus-wide initiatives not provided for in base allocations. Other operating expenditures are expected to decline by 4% after factoring in increases for utilities, System charges and debt service on the McDermott Drive facility and divisional budget reduction plans. A new expenditure line item has also been added to the budget for FY03 – Strategic Initiatives. This expenditure was recommended by the Administrative Budget Committee (ABC) and approved by President's Cabinet during the budget reduction discussions. Even though funding will be a challenge over the next several years, it was agreed that University must continue implementation of the University's *Plan for Excellence*. These dollars will be earmarked for projects to meet the goals set forth in the *Plan* and to further the University's mission.

#### <u>Summary</u>

Initially faced with a \$3.5 million budget shortfall, West Chester University was able through divisional and campus-wide budget review and collaborative discussions to develop strategies to balance the FY03 budget without impacting implementation of the *Plan for Excellence* or the educational needs of our students. Overall, the FY03 University Education and General (E&G) Budget is projected to grow by 4.5% to \$118,617,225.

|  | FY02            |             | FY03             | Percent |

#### West Chester University Capital Budget FY 2003-04

A proposed resolution for the Capital Budget for Fiscal Year 2003-04 is attached. This budget is updated and submitted to the Office of the Chancellor annually, reflecting the University's needs for new facilities or the renovation of existing facilities.

Attachment A is West Chester University's Capital Budget Authorization Request for Fiscal Year 2003/04. This request has been prepared in accordance with guidance provided by the Office of the Chancellor. If approved by the Council of Trustees, it will be submitted to the Board of Governors for consideration in a System-wide capital budget to be forwarded to the Pennsylvania Legislature. Project Summaries, Justifications, Cost Estimates, and Project Planning documents have been prepared for each project.

Attachment B is a summary of previously authorized projects, authorization requests, and future capital budget requirements, with projects listed in priority order.
