

Sample Generative AI Syllabus Statements (Optional)

The Teaching & Learning Center prepared these optional sample syllabus statements to help you craft your own Generative AI policies. We encourage you to review [Syllabus Considerations](#) as you select and craft a statement.

Use with No Acknowledgement

You are permitted to utilize generative AI tools (Chat GPT, Dall-E, etc.) freely throughout the course without the need for explicit acknowledgment. Recognize that material created by these tools may be inaccurate, incomplete, or otherwise problematic. Consider how using these tools may stifle your own independent thinking and creativity. You are still responsible for what is submitted, no matter how it is created.

Use with Acknowledgement

Generative Artificial Intelligence (AI) tools (Chat GPT, Dall-E, etc.) may be used throughout the course, but you are required to provide a citation or acknowledgment when using these tools in any course activities. Proper acknowledgment ensures academic integrity and demonstrates understanding of the source and influence of generative AI tools on your work. When citing generative AI content please use the *(insert style type here)*. Failure to acknowledge the use of generative AI tools may be considered a violation of the [WCU academic integrity policy](#). Submitted work may be reviewed for AI-generated content. You are still responsible for what is submitted, no matter how it is created.

Use with Permission

Generative Artificial Intelligence (AI) tools (Chat GPT, Dall-E, etc.) may be used for specific assignments with **prior** permission. To request permission, *(add your specific directions here)*. When use is allowed, you are required to provide clear citations or acknowledgment that include the tool name and source. I will provide an explanation of the rationale behind allowing or disallowing the use of generative AI tools. When citing generative AI content please use the *(insert style type here)*. Failure to acknowledge the use of generative AI tools may be considered a violation of the [WCU academic integrity policy](#). Submitted work may be reviewed for AI-generated content. You are still responsible for what is submitted, no matter how it is created.

Use for Editing Only

Generative Artificial Intelligence (AI) tools (Chat GPT, Dall-E, etc.) may be used throughout the course to improve your original work but cannot be used to do the initial creation of an assignment. You are required to provide the original assignment before any AI improvements are made as an appendix to the assignment. Providing your original draft ensures academic integrity and demonstrates understanding of the source and influence of generative AI tools on your work. Failure to provide your original draft may be considered a violation of the [WCU academic integrity policy](#). Submitted work may be reviewed for AI-generated content. You are still responsible for what is submitted, no matter how it is created.

Use for Idea Generation Only

Generative Artificial Intelligence (AI) tools (Chat GPT, Dall-E, etc.) may be used throughout the course only for brainstorming, structure creation, and idea generation. AI tools cannot be used to create assignments. Any submitted work may be reviewed for AI-generated content. Submission of AI-generated work for this course will be considered a violation of the [WCU academic integrity policy](#).

No Use

The use of generative artificial intelligence (AI) tools (ChatGPT, Dall-E, etc.) is not permitted. (*Explain why for your specific discipline and course context*). Any submitted work may be reviewed for AI-generated content. Submission of AI-generated work for this course will be considered a violation of the [WCU academic integrity policy](#).

For 145 additional syllabus statement ideas see [Classroom Policies for AI Tools](#).
